

"Slaughtering"

solutions to get meat for
local markets"

Models adapted to small farms and short food supply chains

Romanian experience:

- Small-scale slaughterhouses
- Farm-attached slaughter points
- Semi-mobile and cooperative models

Why Do We Need Alternative Solutions?

Long distances to
industrial slaughterhouses

High transportation costs

Additional stress for
animals;

Limited opportunities for
local marketing;

Main objective: Local meat for local
markets

Short Supply Chains and Rural Economy

Benefits

- ✓ Fewer intermediaries;
- ✓ Increased farmers' income;
- ✓ Better traceability and consumer confidence;
- ✓ Reduced environmental impact;
- ✓ Retention of economic value within rural communities.
